

## Morning Brief

Date/Time Stamp: Friday, Feb 10, 2017, 07:21

---

### Northwest Activity Summary

Some resources committed to the Southern and Eastern area, mainly for prescribed fire support. Over the last week, temperatures were slightly cooler than normal in the north and slightly warmer than normal in the south. Precipitation was well above normal through most of the region with minor flooding in many areas. No new fires or prescribed fires were reported.

### Northwest Fire Activity

#### Weekly Summary (Feb. 3 – Feb. 9)

##### Large Fire Summary

New large fires: 0

Large fires contained: 0

Uncontained large fires: 0 (OR: 0, WA: 0)

##### New Fires and Acres

0 fire for 0 acres

0 acres growth on existing large fires

OR: 0 fires for 0 acres

WA: 0 fires for 0 acres

##### Northwest IMT Activity

NIMOs committed: 0

Type 1 IMTs committed: 0

Type 2 IMTs committed: 0

IMSR (usually) published Friday only.

The following information is from Feb. 10.

#### National Fire Activity (Feb. 3- Feb. 9)

Initial attack activity: 797 new fires

New large incidents: 17

Large fires contained: 14

Uncontained large fires: 7

#### National IMT Activity

Area Command Teams committed: 0

NIMOs committed: 0

Type 1 IMTs committed: 0

Type 2 IMTs committed: 0

---

### Northwest Current Incident Details

Incidents not Previously Reported: 0

Incidents Previously Reported: 0

### Northwest Fires Utilizing Monitor, Confine, Point Zone Protection Suppression Strategies (YTD) (link)

Lists fires (of any size) that singly utilize Monitor, Confine or Point Zone Protection suppression strategies, or use Multiple Suppression Strategies (which may also include a Full Suppression component).

---

### Northwest Fire Potential Summary

There will be showery weather on Friday with rain at lower elevations and snow in the mountains. High pressure builds in over the weekend and into early next week. Potentially persistent fog may keep temperatures cooler than normal but areas outside the fog will be near seasonal norms. Unsettled conditions will bring precipitation back to the region around mid-week with generally higher than normal snow levels. Significant fire potential remains low.

More info, see [NW 7-Day Significant Fire Potential Forecast](#), and [National 7-Day Significant Fire Potential Forecast](#)
